

THE MUSIC

The sound of ECLIPTICA is defined in their musical roots, to point out the classical heavy metal of the 80ies as well as rhythm progressive elements from all decades.

The main character of ECLIPTICA's music is basically Power Metal, influenced by the sound of Queen, Maiden and Metallica not to name the mass of bands raised in the power metal genre of the last 10 years.

ECLIPTICA's song writing is situated between classical style features and the use of material from other genres.
